

Flexible program may be studied full time or part time

(Pre-requisite is Certificate IV in Massage (HLT40307) - minimum 360 hours plus Senior First Aid Certificate. Evening classes starting 20/04/10)

In deciding to continue your studies by completing the Diploma of Remedial Massage, you will be among the most highly trained remedial massage therapists in Australia. You will learn the special language, skills and knowledge required to take your place confidently with other health professionals in the natural health field, and also with mainstream medicine where many natural therapists are working alongside doctors, midwives, physiotherapists, chiropractors, community nurses, birthing units and others. This qualification is also a way of doing a degree in Health Sciences. In addition to the remedial massage **diploma core modules** (see below) you will also have the benefit of a number of other interesting and varied modalities to choose from to add depth and expertise to your practical skills. These include Reflexology, Sports Therapies, Fijian Floor Massage, Advanced Aromatherapy, Lymphatic Drainage, Infant Massage Instructor's Certificate, Traditional Pacific Island Massage and Sacred Stone Therapy, Beauty Techniques for Massage Therapists, Trigger Point Therapy and more.

Pathophysiology - Compulsory Core Module for Diploma - You will be introduced to the basic pathological processes of the body, the methodology of history taking, physical examination and the study of diseases in each of the body systems. You will learn the special language skills you need to be able to confer with other health professionals, write reports and referrals, understand the way medical terminology is "put together" and learn the common abbreviations used by mainstream health professionals in liaising with each other, and with you.

Sports Therapies (elective) - This course has been designed for those of you who are interested in developing the specialised skills necessary for working with athletes, sports persons, dancers and others. You will learn before and after event treatments, assessment of commonly occurring minor injuries and how to treat them, how to release tight or constricted muscles and techniques for increasing mobility flexibility and range of motion using a variety of techniques and exercises to strengthen and increase flexibility.

Lymphatic Drainage - Some of the best techniques you will ever learn in this industry and much in demand. Taught by Vikki Cole who also teaches at Nature Care, she is both an excellent teacher and makes her classes fun! See more details in [Special Courses](#)

Aromatherapy 2 and 4 - Refer to [Certificate IV in Aromatherapy](#) outline for more details.

Supervised Clinic - an additional 50 hours will be completed for the Diploma of Remedial Massage. Please refer to Supervised Clinic Outline for timetable and information.

Electives - electives totalling 140 hours are required for the Diploma, please choose from the list below. For electives course outlines please refer to the [Special Courses](#) outline. These hours are required to meet industry standards of ATMS and allow you a provider number from Health Funds. Note some classes have a choice of daytime or evening or afternoon. We will help you
