

Thank you for your interest in Summer School 2010

Thank you to everyone who enrolled in Summer School courses and there were a lot of you. Unfortunately we had interest in almost all of the courses but not enough people in any one of the topics to be able to run the course!

If you were disappointed, we are so sorry!

We have decided to run some of the courses through the year and we have some great subjects lined up (see below), as well as the more popular ones in Summer School. We will program them through the year and advertise them on the "What's New" page on the website. Keep a look out for those you are interested in! Again, we have to have at least 8 people to run each one and make it a happy and satisfying day for you.

Animals benefit greatly from massage and other natural therapies. We are putting together a unit to assist you in learning these skill for your own animals to benefit from or as another skill you can offer your clients if you are working with animals already. Keep a watch out for the dates!
